

TRUST THE EXPERTS

SERVICING KITS

english

TechnoAlpin snow guns boast an **extremely long service life**. Even after years, their performance can be optimized and maintained at a constantly high level through regular servicing and inspection. TechnoAlpin has therefore assembled a spare parts and servicing kit for each model.

Trust the experts.

TechnoAlpin has drawn on many years of experience in carefully putting together various kits. TechnoAlpin has selected the parts needed for repairs and maintenance depending on how long a snow gun has already been in use, saving you valuable time and giving you peace of mind that all the necessary spare parts are available.

TECHNOALPIN®

All the spare parts in any one servicing kit are carried under one article number for each snow gun in order to simplify the order process. Please order your servicing kit the quick and easy way through the **TechnoAlpin service portal** or contact your TechnoAlpin service partner if you would like further information.

SERVICING KITS

The kits vary according to the length of service already completed by a snow producer and contain **different components for each model.**

FAN GUNS **SERVICING KITS**

- › **3 seasons:** These kits contain the **main gaskets, O-rings, drain ballcocks, drain springs** and **air hoses**.
- › **6 seasons:** These kits contain the main gaskets, O-rings, drain ballcocks, drain springs and air hoses. They also contain replacement **nucleators**.
- › **9 seasons:** These kits contain the main gaskets, O-rings, drain ballcocks, drain springs, air hoses and nucleators. They also contain **nozzles** and **filters** which should be replaced after 9 seasons.

SNOW LANCES **SERVICING KITS**

- › **3 seasons:** These kits contain **O-rings, drain ballcocks, drain springs** and, when necessary, **air hoses**.
- › **6 seasons:** In addition to O-rings, drain ballcocks and drain springs, the **nucleators** are also replaced on the majority of lances after 6 seasons.
- › **9 seasons:** These kits contain O-rings, drain ballcocks, drain springs, air hoses and nucleators. They also contain the **filters** which should be replaced after 9 seasons.

COMPRESSOR **SERVICING KITS**

The air compressor is a central component of snow producers. For optimal performance of the fan snow producer or lance with on-board compressor, it is important to service the compressors every 3000 and 6000 hours of operation: filter mat, joints, O-rings, piston rings etc. The servicing kit contains the necessary parts to preserve the service life of the air compressor.
